   - Leonardo da Vinci was a man who created many things. He was a painter, inventor and Renaissance Man. As he is mostly known for his painting Mona Lisa and his other artwork, he was involved in many other practices, one of which was robotics. He created drawings for a fully automatic robotic knight. This knight has been recreated according to his plans and is able to stand, sit, raise its visor and independently maneuver its arms, and had an anatomically correct jaw. Leonardo was ahead of his time and even though he wasn’t able to make the robot, Leonardo displays a cornerstone of the robotics of the past.
