

Practice It

Comparing Numbers to 120

Use the online dice tool or dice you have at home to generate two-digit numbers to compare to each other. Roll the dice twice, one time to get your tens place, and one time to get your ones place, for each number. Write your numbers in the bigger boxes below. Then decide which sign to use once you have compared them. <http://www.didax.com/apps/dice/>

<input type="text"/>	<input type="text"/>	<input type="text"/>
