

PRACTICE IT TEKS 3.3E

Let's Share!

Materials Needed:

- Recording document
- Cookie spinner
- Kid spinner
- Paperclip
- Pencil

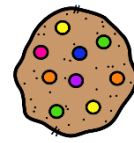

Directions:

Using the paperclip and the pencil, spin the spinners to determine the number of kid and the number of cookies. Draw the number of cookies and show your work. Determine the fraction of cookies each person would get if they were to share the cookies evenly. Continue to play until you have completed the recording document.

If you don't have a printer you may still play by creating your own recording documents and spinners using paper you have at home.
