

Dear Parent:

Your child has signed up for a technical crew or is in a technical theatre class at Pearland High School. Work in this environment often requires maturity and training to maintain safe working conditions. I provide training on power tool use and shop safety before we allow the students to begin work, and we would like to enlist your aid in reinforcing the necessity of a safe learning environment.

You may wish to discuss with your child what he or she has learned about safety in his or her classroom work. Be certain that your child remembers to wear all proper safety equipment (goggles, safety harnesses, gloves, etc.) when appropriate while participating in technical theatre. Be certain he or she understands our shop rules concerning wood cutting tools and electricity. Be certain he or she understands the seriousness involved working with power tools.

Together we can help your son or daughter have a safe and positive experience as he or she learns skills that will help them excel in all facets of life.

Thank you,

David Barker
Technical Director
Pearland High School
