

While at school, students are required to use the district network. On district-provided iPads, the Pearland ISD student network will automatically connect when on campus. No additional login information is necessary.

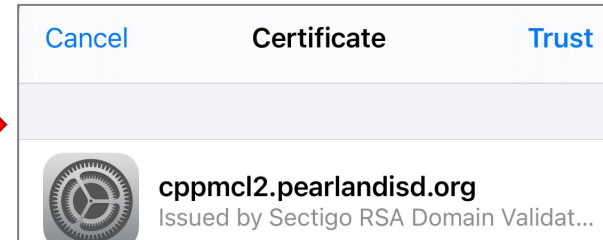

On personal iPads, students will need to join the PISD-ORG network while on campus

Available WiFi networks can be found in Settings > Wi-Fi

Enter the student's Pearland ISD username and password ([Guidelines](#)), then click Join

To fully connect with internet access, users will have to trust a certificate from *.pearlandisd.org. This certificate will be presented to you after successfully connecting to the network. For home use, district-provided iPads may be connected to other networks not provided nor managed by the district.
